SUMMARY

Full-Stack Web Developer with 3+ years of experience building responsive, production-ready websites and SaaS applications. Experienced in React.js, Next.js, TypeScript, Node.js, Express.js, PostgreSQL, MongoDB, Supabase, REST APIs, and third-party integrations. Strong background in developing end-to-end features, implementing role-based access control, integrating payment systems, optimizing web performance, and translating business requirements into scalable and maintainable applications.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, SQL, HTML5, CSS3

Frontend: Next.js, React.js, Tailwind CSS, ShadCN, TanStack Query, Zustand, Zod, Redux, Bootstrap, SCSS

Backend & Data: Node.js, Express.js, PostgreSQL (Row Level Security), Supabase, Drizzle ORM, MongoDB

Integrations: Stripe, PayPal, REST APIs, Facebook Pixel, TikTok Pixel, Everflow, Konnektive, Sticky.io

Testing & Tools: Playwright, Jest, Git, Figma, Gulp.js, Handlebars.js, jQuery, Sentry, Postman, CI/CD

PROFESSIONAL EXPERIENCE

CurbPage August 2025 – September 2026 | [Live](#)

Full-Stack Developer | Remote (US-based startup)

- Built SaaS features in [Next.js](#), ReactJS, TypeScript, and Tailwind CSS for clients, transactions, documents, workflows, and communication, replacing disconnected manual processes with one organized platform.
- Designed role-based access control for Admin, Agent, Client, and Teammate roles using middleware, protected routes, and subscription guards, enforced at the database with Supabase PostgreSQL Row Level Security.
- Integrated Stripe subscription billing and customized pricing and plan logic for the platform's monetization model.
- Authored schema migrations with Drizzle ORM to evolve the data model safely as features shipped pre-launch.
- Converted Figma designs into reusable, responsive components that stay consistent across desktop and mobile.
- Wrote end-to-end tests with Playwright and unit tests with Jest; diagnosed bugs and contributed to architectural decisions.

Media Communication Corp. March 2024 – July 2025

Front-End Developer | Remote (Boca Raton, FL)

- Built and maintained responsive websites with HTML5, CSS3, JavaScript, and Handlebars.js.
- Automated builds with Gulp.js and optimized assets to reach 90%+ scores on GTmetrix, PageSpeed Insights, and Lighthouse.
- Ensured cross-browser compatibility and responsive layouts across devices and screen sizes.
- Used Git and participated in code reviews to keep deliverables high quality.

PROJECTS

Time Tracking & HR Support Platform 2025 | [Live](#)

MERN stack | TypeScript, ShadCN

- Built a full-stack app with time tracking, ticketing support, and HR request management, with admin access controls.
- Developed authentication and authorization routing with React Router v6 so each department sees only what it should.
- Used TypeScript for data typing and ShadCN for responsive UI components; integrated REST APIs between frontend and backend.

E-Commerce Website 2025 | [Live](#)

.NET Razor, Vanilla JS, jQuery, Gulp.js

- Built online ordering with PayPal and credit/debit card payments.
- Converted Figma mockups into mobile-first, pixel-accurate pages; reached a 90% performance score and under 3 seconds for TTI and onload time using WebP images, minified assets, and Gulp.js automation.
- Integrated Facebook Pixel, TikTok Pixel, Everflow, Konnektive, and Sticky.io for tracking and automated customer management.

EDUCATION

Avion School | Full Stack Web Development June 2023 – February 2024

Talisay City College | B.S. in Industrial Technology 2015 – 2019
