PROFESSIONAL SUMMARY

- Mid-Level Software Engineer / Full-Stack Web Developer with 3+ years of experience building responsive, production-ready websites and SaaS applications. Experienced in React.js, Next.js, TypeScript, Node.js, Express.js, PostgreSQL, MongoDB, Supabase, REST APIs, and third-party integrations. Strong background in developing end-to-end features, implementing role-based access control, integrating payment systems, optimizing web performance, and translating business requirements into scalable and maintainable applications.

TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript, HTML5, CSS3, SQL, C#.
- **Frontend:** React.js, Next.js, Tailwind CSS, Bootstrap, TanStack Query, ShadCN, SCSS.
- **Backend:** Node.js, Express.js, Ruby on Rails, .NET Razor.
- **Databases:** PostgreSQL, MongoDB, Supabase.
- **APIs & Integrations:** REST APIs, Stripe, PayPal, Facebook Pixel, TikTok Pixel, Everflow, Konnektive, Sticky.io
- **State & Validation:** Zustand, Redux, Zod.
- **Testing:** Jest, Playwright
- **Tools & Design:** Git, Figma, Gulp.js, Handlebars.js, jQuery.
- **Additional:** PHP, WordPress, WooCommerce, Appwrite, Svelte, Material UI .

PROFESSIONAL EXPERIENCE

CurbPage | WFH — **Northwest, Arkansas**

Front-End Website Developer / Full-Stack Website Developer — August 2025 - September 2026

- Built centralized SaaS features for clients, transactions, documents, workflows, and communication, replacing disconnected manual processes with an organized platform for day-to-day operations.
- Engineered middleware-based role-based access control (RBAC), protected routes, and subscription guards so users could only reach the features their role and plan allowed.
- Built reusable, responsive components and structured application workflows in Next.js, TypeScript, and Tailwind CSS, keeping the experience consistent across desktop and mobile.
- Integrated Stripe APIs and customized payment workflows to support the platform's subscription and monetization model.
- Used Playwright for end-to-end testing and Jest for unit testing.
- Diagnosed and resolved bugs and contributed to architectural decisions during pre-launch development, helping the team iterate faster and ship a more stable product.

Media Communication Corp. | WFH — **2505 NW Boca Raton Blvd, Boca Raton, FL 33431**

Front-end Website Developer — March 2024 - July 2025

- Developed and maintained responsive websites using modern web technologies including HTML5, CSS3, JavaScript, and various frontend frameworks.
- Implemented performance optimizations using Handlebars.js and Gulp.js to achieve 50% website optimization and produce cleaner, maintainable code.
- Optimized websites for enhanced user experience and performance, achieving 90%+ performance scores using GTmetrix, PageSpeed Insights, and Lighthouse tools.
- Ensured cross-browser compatibility and responsive design across all devices and screen sizes
- Maintained version control using Git and collaborated on code reviews to ensure high-quality deliverables

PROJECT WORK

Curbpage | Developer | Repo | Live — 2026

AI-powered real estate SaaS platform that centralizes clients, transactions, documents, workflows, communication, and payments to streamline real-estate operations and improve client visibility.

- Designed role-based authorization architecture spanning Admin, Agent, Client, and Teammate roles, enforced at both the middleware/routing layer and the database layer.
- Configured PostgreSQL Row Level Security (RLS) policies in Supabase so data access was enforced at the database layer, not just in application code.
- Integrated Stripe subscription billing and customized pricing/plan logic to fit the platform's monetization model.
- Authored database schema migrations with Drizzle ORM to evolve the data model safely as features were added pre-launch.
- Converted Figma layouts into pixel-perfect, fully responsive pages across desktop and mobile.

Document Management System | Developer | Repo | Live 2025

A full-stack application with MongoDb ExpressJs NodeJs and ReactJs (MERN) Technology, with a feature of Time tracker, Ticketing Support and HR Support Request, with admin access.

- React Router v6 was used to develop authentication and authorization routing, guaranteeing safe and convenient access for many departments. which resulted in a 20% reduction in load times, 40% improvement in routing performance, and simplified navigation and overall security by 35%.
- Developed a comprehensive full-stack web application featuring time tracking, ticketing support, and HR request management with admin access controls
- Use Typescript for data types and Shadcn to improve the user interface by 50%.
- Utilized TypeScript for robust data typing and error prevention, improving code maintainability and reducing bugs by 25%.
- Designed responsive user interface components using ShadCN, improving user experience by 50%
- Integrated RESTful APIs for seamless data communication between frontend and backend systems

E-Commerce Website |WFH | Repo | Live 2025

A full-stack application with Razor.Net for the backend and Vanilla Js for the frontend using Jquery, Where User, Can Order an Items Online and Paid Via Paypal or Debit Credit Card

- Built a complete e-commerce solution enabling online ordering with integrated PayPal and credit/debit card payment processing
- Converted Figma mockup designs into responsive, production-ready code using a mobile-first approach, ensuring pixel-perfect layouts across all devices with over 95% design accuracy.
- Optimized the website by maximizing the use of WebP images, minifying CSS and JavaScript, and automating tasks with Gulp.js—resulting in a lightweight build with a 90% performance score and under 3 seconds for both Time to Interactive (TTI) and Onload Time (OT) based on GTmetrix, PageSpeed Insights, and Lighthouse reports.
- Integrated Facebook Pixel, TikTok Pixel, Everflow, and CRMs like Konnektive and Sticky.io to enhance tracking, automate customer management, and boost marketing performance - resulting in a 40% increase in tracking accuracy and improved customer retention.
- Improved tracking accuracy by 40% and enhanced customer retention through automated customer management systems

---

EDUCATION

Full Stack Web Development, *Avion School* **June 2023 - Feb 2024**

B.S. in Industrial Technology, *Talisay City College* **2015 - 2019**
